## **Work Management Subgroup**

### **Peer Assist Visit Best Practice**

**Steven Little**

**Subgroup Chair**

## *Work Management Subgroup*

- Objective: Share challenges, tools, and processes for accomplishing ISM at the task or working level.
- Focus on meeting the increased demands of improving productivity while keeping the quality of the work and safety of our workforce at the highest level.

## *Peer Assist Visit Objective*

- Observe and evaluate the work management process at the host facility.
- Utilize the CRAD from the NNSA's "Guide to Work Planning and Control at the Activity Level".
- Review work processes and field work
- Focus on identifying best practices to be shared across the DOE community.
- Identify opportunities for improvement for host facility.

## *Benefits for Host Facility*

- Non–threatening assessment
- Focused on areas the host facility determines
- Opinions provided from outside the facility
- Credibility of the participants is high
- Expertise is focused

## *Benefits for Participants*

- Detailed look at another DOE facility's processes
  - Best method for benchmarking
- Sharing of ideas and concepts
- Observation of implementation methods and challenges
- Look at new processes and tools
- Bring home new perspectives

## *Completed Assist Visits*

- CH2M Hill Hanford – 2006
- Savannah River Site (SRS) – 2007
- Lawrence Livermore National Laboratory (LLNL) – 2008
- Y-12 National Security Complex – Spring 2009

**CH2MHILL**  
Hanford Group, Inc.

## *CH2M Hill Hanford Results*

- Original pilot facility
- Introduction to HPI in use for many participants
- Excellent worker involvement
- Good focus on identification of critical tasks and associated hazards
- Error prevention techniques used in the field
- *Contact: Tony Jennings (509) 373-3447*

## *Savannah River Site Results*

- Mature work control process
- Planning and scheduling rigor is commensurate with complexity of work (graded approach)
- Peer reviews of work packages
- Excellent use of photographs in packages
- Good training program for Planners
- Good participation of workers/crafts
- *Contact: Tim Flake (803) 557-4485*

## *Lawrence Livermore Natl. Lab. Results*

- Skill of Craft manual & related hazard analysis document for each craft
  - Facility POC process
  - Highly skilled and dedicated workforce
  - Clean workspaces – pride in workmanship
  - Excellent knowledge by all on work control process
- 
- *Contact: Donna Governor (925) 424-4478*

# *Y-12 Peer Review – Spring 2009*

- Please plan on attending.
- Check out our web page for additional information.
- Get involved!

## **Work Management Subgroup 4<sup>th</sup> Annual Peer Review / Assist Visit Spring 2009**

### **Y-12 National Security Complex**

This is the 4<sup>th</sup> of our annually scheduled peer reviews for the work management subgroup.

The objective of these peer reviews is to support the host site with a critical look at the work control processes and implementation at the host site focused in areas that the site determines would be most helpful to them.

A second objective is to provide the Work Management Subgroup members with a chance to see host site processes and practices and bring back ideas and methods that they feel will improve their processes and implementation.

Further information will be posted and distributed as the details of this review are established.

#### Information yet to come:

- Agenda for the review
- Map of the Area
- Hotels in the area
